==

nav bar
----

divide the header section into 2 parts
    1 part / 1st column --> 40% width
    2nd part / 2nd column --> 60% width

==

task - 1

   - go to google and search footer component, select any one model and try to develop it using react

 task - 2
----

design the below same as flipkart navbar

===

Till now we have cover

    React Elements
    JSX Elements
    Functional Components
    Props

need to cover

    State

the above all are basics of the react.
70% of interview will be on the above topics and javascript concepts(advance concepts).

===
Interview Pattern

    1st --> interview happen in javascript,
     then interview will happen on react.

    Advance concepts of javascript + Basic Concepts of React
    then advance concpets of React.
===

task-3
----

task-4
